

Satworx Announces Maritime Promotion

Get a Free Satellite Phone Valued at up to \$15,000 and Airtime with any Satworx Premium Plan

LAS VEGAS, Nov. 4 /PRNewswire/ -- Satworx (www.satworx.com), the leading provider of satellite phone solutions, today announces a promotion benefiting those in the maritime industries such as shipping and fishing or leisure sailors who spend time on small and large vessels where cell phone service is unavailable. Now through December 31, 2009, any boat owner or captain that signs a premium plan contract with Satworx will receive one of three free Sailor FleetBroadband satellite phones, valued between \$5,000 - \$15,000. Sailor FleetBroadband is the only satellite solution for maritime communication that provides cost-effective data and voice in a single terminal. The terminal also provides real-time weather updates, uninterrupted access to email, the internet, fax and calls, the most up-to-date chart data and efficiency route planning. A crew calling feature keeps operating costs low and crew morale high.

The Satworx FleetBroadband solution offers affordable ship-to-shore voice and simultaneous data at up to 432kbps. Satworx premium plans are billed to clients on a monthly basis and include voice minutes for calls and Mb's for internet, email and other data functions. Satworx offers three different options:

1. Entry: Monthly Cost: \$1200/ Package Value: \$1705 (126Mb or 1139 minutes free airtime/month)
2. Mid: Monthly Cost: \$3300 / Package Value: \$5192 (385Mb or 3474 minutes free airtime/ month)
3. High: Monthly Cost: \$5500/ Package Value: \$14063 (1041Mb or 9322 minutes free airtime/ month)

"Staying in touch with business and personal contacts is just as important at sea as it is at home," said Sean McCready, Marketing Director at Satworx. "The Satworx FleetBroadband solutions are the first to provide truly cost-effective satellite solutions on any vessel."

Owning a satellite phone on board enables coastal merchants, fishing vessels and small leisure vessels to sail confidently knowing that in the event of an emergency, their satellite phone will instantly be able to connect them to the coast guard or other emergency personnel. Peace of mind also goes to the family and friends of sailors, knowing they can be reached anytime while at sea. All of Satworx satellite phones come with 24-hour customer service. For more information on the Satworx maritime plans, call 1-866-SATWORX or visit: <http://www.satworx.com/fleetpromo.php>.
