COMPACT POWER Good Things in Small Packages

The Satworx Iridium 9555 is not only the smallest phone Iridium has ever made, it is also the most powerful. At less than 10 oz (266g) the 9555 handset is the lightest insurance policy you can carry in your daypack. A significantly reduced footprint over previous models not only gives the phone an ergonomically superior hand-fit, it also features an aerodynamic internally stowed antenna.

For more information contact your local Satworx authorized dealer.

Satworx 9555

Handheld Satellite Phone

Satworx Iridium 9555 Satellite Phone

Satellite Communications in the Palm of Your Hand

The Satworx Iridium 9555 satellite phone is the latest, smallest and lightest handheld model from Satworx and it is connected to the only seamless and most reliable global mobile communications network.

From pole-to-pole the Satworx Iridium 9555 can always connect you to the world over the most comprehensive satellite network and backed by first-in-class 24/7 technical support.

AN AFFORDABLE ESSENTIAL

Mobile communications is no longer a simple luxury but an affordable essential for leisure travel, business and government. Our need to communicate does not end at the last cell tower down the road, perhaps literally down, on the road, due to a natural disaster. The 9555 connects first responders, colleagues and loved ones regardless of conditions on the ground, any ground on the planet.

TOUGH CONDITIONS REQUIRE A TOUGH PHONE

Tough Conditions Require a Tough Phone

Engineered to withstand the worlds adverse conditions your personal communications system is shielded by a shock, water and 'earth' resistant casing. From rainforests to deserts and mountain ranges, tough conditions require a tough phone engineered as a dependable lifeline to deliver critical communications, whenever and wherever. In addition to the standard features you have come to rely on, the Satworx Iridium 9555 adds innovations such as a speakerphone, improved SMS and email messaging capabilities, and an upgraded Mini-USB data port. The evolution of satellite phones continues, making communication more efficient and effective for subscribers everywhere.

CONSIDER YOUR NEED / APPLICATION

TRAVEL

Travelers have far more exotic itineraries than ever before. A trip to the South Pole - no problem. Take a cruise and call from your 9555 at less than half the price of a cell phone roaming call. And when you actually get to the poles - don't forget to call mom.

CORPORATE

For many professionals, the desk is not in a New York office but in a shed at an oil shale deposit in the Canadian wilderness or a ranch in Brazil the size of Vermont. And cell phone tower locations are not part of the build criteria for oil pipelines or hydroelectric dams. The 9555 handset connects offices from the Amazon to New York and beyond.

“ Most cruise ships now have their on-board cell towers at an exorbitant \$4/min! ”

GOVERNMENT

Military conflicts arise in the most forbidding and desolate terrain on the remotest corners of the earth. How does UN call out of the Congo jungle? Or NATO from Tora Bora? Or the National Guard when infrastructure collapsed in New Orleans? No, the answer is not smoke signals. They use satellite phones whose service is unaffected by events on the ground.

ACCESSORIES

INDOOR

Fixed Mast Antenna

Marine-rated for permanent vessel or fixed site application.

Indoor Docking Station

Indoor docking station that connects to a PBX for fixed land indoor use.

10-meter coax Iridium antenna cable

Ensures strongest possible signal by providing a connection between the Iridium fixed mast antenna and the Satworx Iridium 9555 satellite phone.

VEHICLE

Car Kit

Works in all types of vehicles, such as cars, trucks, boats, yachts and ships. This Iridium docking station improves availability of the Iridium satellite service on the go.

Mobile Magnetic Mount Antenna

Larger antenna with magnetic or fixed mounting options includes an attached 5-meter cable.

DATA

Data Kit

Allows you to send and receive data from your Iridium Portable Phone. Includes data connector, serial cable, stand and CD software.
